

e 2007-00134,

believe that Kentucky American Water's proposed
ool 3 on the Kentucky River to Newtown Pike in Fayette
ast cost solution to the water needs of Central Kentucky.
do not believe that a private for-profit company should
lly from the destruction of my property or my neighbor's

ens of Central Kentucky deserve a long-term solution to
s. Utilization of a larger water body, such as the Ohio
ng existing utility corridors makes the most sense
nvironmentally, and aesthetically.

nents: AFTER this past summer's
I truly believe the "OHIO River"
is in the best interest of the public.
